## INSTRUCTIONS FOR USE

### Donning Procedure

1. Hold the respirator in hand with nose clip at your fingertips.
2. Place the respirator under your chin and its nose clip upwards. Pull the ear loop on one end around one ear, repeating this step for the opposite ear loop.
3. Push the nosepiece inwards with your fingertips to conform to the shape of your nose.
4. Face fit check must be done each time the respirator is worn:
  - I. Cover the respirator with both hands, breathing sharply. If leakage along the nose bridge is detected, repeat step 3 and adjust the shape of the clip to the nose bridge.
  - II. If leakage is detected along the rest of the respirator edge, adjust the straps again.
  - III. If leakage cannot be eliminated, do not wear the respirator and stop going into the contaminated environment. Refer to your supervisor for assistance.
